Email Alerts

Email alerts can be activated threw the email alert settings page in the Control Panel.
To launch an email alert check, fire a HTTP request agains @base_url / email / {{interval}}
The interval is a value in seconds, that the email alert check should look at.

Here is a list of some of the requested values:

Name	Value
Per minute	60
Per five minutes	300
Per fifteen minutes	900
Per half an hour	1800
Per hour	3600
Per three hours	10800
Per 6 hours	21600
Per 12 hours	43200
Per day	86400
Per week	604800
Per month	2678400
Per year	31557600
